## PROFILE

I am a frontend developer with expertise in React, Redux, TypeScript, and other front-end technologies. I have 2+ years of experience building scalable and responsive web applications. I am passionate about developing high-quality user interfaces and am constantly learning new technologies and best practices to stay up-to-date.

## EXPERIENCE

### SOFTWARE ENGINEER

**iTechArt | 11.2022 - present**

- Developed multiple web applications using React, Redux, and Redux Toolkit to build scalable and responsive user interfaces
- Utilized Webpack and Vite for bundling and optimization of the front-end code
- Created UI components using NextUI and optimized them for different devices
- Integrated GraphQL and REST APIs with AXIOS to communicate with server-side services

### FRONT-END DEVELOPER

**Clarity Project | 08.2020 - 11.2022**

- Worked on multiple projects using React, Redux, and Redux Saga to build scalable and responsive web applications
- Collaborated with cross-functional teams to implement new features and optimize existing codebase
- Developed and maintained unit tests to ensure code quality and prevent regressions
- Utilized Git and Bitbucket for version control and Jira for project management
- Designed and implemented UI components using Material UI and Figma
- Created stories and developed components using Storybook to enhance reusability and collaboration
