EDUCATION

Automation Engineer

Belarusian-Russian University
2013 - 2018

STACK

- React
- Redux
- TypeScript
- JavaScript
- SASS/LESS
- Jest
- REST API
- Storybook
- Git
- Webpack
- CI/CD

LANGUAGES

- English Upper-Intermediate
- Polish Upper-Intermediate
- Russian Native
- Belarusian Native

PROFILE

I am a frontend developer with expertise in React, Redux, TypeScript, and other front-end technologies. I have 4 years of experience building scalable and responsive web applications. I am passionate about developing high-quality user interfaces and am constantly learning new technologies and best practices to stay up-to-date.

EXPERIENCE

FRONTEND DEVELOPER

LSEG (London Stock Exchange Group) | 07.2023 - present

- Developed a fintech applications using React, JavaScript, and TypeScript, LESS
- Developing and maintaining client applications using React, JavaScript, and TypeScript.
- Designing and implementing application architecture using Redux Observable and RxJS.
- Optimizing development processes using build tools such as Webpack.
- Participating in UI design using Figma.
- Implementing functionality to ensure high levels of security and performance in applications.
- Introducing and testing new technologies and approaches to improve code quality and development processes.
- Collaborating with other developers, designers, and product managers to achieve project goals.
- Conducting code reviews and ensuring compliance with coding standards and best practices.
- Developing and supporting cross-platform applications, ensuring their functionality on various devices and browsers.
- Developed and maintained unit tests and screenshot to ensure code quality and prevent regressions

SOFTWARE ENGINEER

iTechArt | 11.2022 - 06.2023

- Developed multiple web applications using React, Redux, and Redux Toolkit to build scalable and responsive user interfaces.
- Utilized Webpack and Vite for bundling and optimization of the front-end code to enhance performance and development efficiency.
- Integrated GraphQL and REST APIs using Axios library to communicate with server-side services.
- Created UI components using NextUI and optimized them for various devices.
- Improved performance and optimized server requests through integration of GraphQL and REST APIs with Axios.
- Implemented component testing using Jest and React Testing Library to ensure code quality.
- Optimized development processes through automation of build, testing, and deployment of applications.
- Participated in code reviews and knowledge sharing with colleagues to enhance code quality and consistency.
- Researched new technologies and approaches in frontend development for continuous professional growth.

FRONTEND DEVELOPER

Clarity Project | 08.2020 - 11.2022

- Developed new features and functionalities using React, TypeScript, and Redux Saga.
- Implemented optimization strategies to enhance the performance of the application.
- Customized and optimized existing functionalities to meet evolving requirements.
- Actively participated in bug fixing and provided ongoing support to ensure smooth operation.
- Conducted comprehensive unit tests to ensure the accuracy and reliability of the codebase.
- Enhanced design aesthetics and user experience to improve overall usability.
- Conducted thorough code reviews to maintain code quality and adhere to best practices.
- Established and maintained socket server connections to facilitate real-time communication.
- Worked with Twig templates to streamline frontend development and templating processes.
- Utilized design tools like Figma to collaborate on UI/UX design and ensure seamless integration of designs into development workflows.
